BALDON lamp is a linear design lighting object made of brass, handcrafted in Germany. It provides a directed, adaptable downward wide-angle light, perfectly illuminating big tables, counters, kitchens, conference tables, bar areas and lobbies. The minimal design stands out for the evocative graphic-sculptural impact of the slim silhouette. Nearly invisible wire creates the illusion of hanging freely in mid-air. Baldons special feature is the option to expand the lamp by just plug in a further segment.

All pieces are handcrafted and made to order.

Baldon is only available in brass. The surface is satin polished and raw. As the item is unlacquered, it naturally oxidizes.
